# Source Direct™

## **Services include:**

Sourcing, Product Development, Design,  
Engineering, Tooling, Manufacturing  
Delivery, Warehousing, Order Processing  
Quality Control, Logistics  
Door to Door Service

## **Offices in Hong Kong, Zhongshan, Atlanta, Tampa and Chicago**

Over 100,000 sq ft of warehouse space to assist in US distribution of any product  
Highly accomplished team includes Full time, US trained electrical, mechanical Engineers, and Marketing and  
Packaging specialists. All dialects spoken  
Proven expertise in electronics, small electrics, house wares, sporting goods, personal care, cosmetics, metals and  
plastics  
- Products sold worldwide-

## **OVERSEAS MANUFACTURING CAN BE COMPLEX -WE HAVE A PROVEN SYSTEM –**

**SOURCE DIRECT™**, an American company with offices in Tampa, Chicago, Hong Kong and ZhongShan, has been helping companies manufacture goods in China for over 20 years.

We've solved the logistical nightmares of dealing in a foreign country, we can offer significant manufacturing savings over domestically produced goods while maintaining and improving price, quality, and delivery.

**SOURCE DIRECT™** handles all logistics from product concept to delivery to your facility or ours.

With full-time employees in four established offices in the US and China, **SOURCE DIRECT™** will help you increase margins to make more money. If you are being pressured to lower prices, but costs are rising, if product development is becoming time consuming and costly, If you want to spend more time growing your business, **SOURCE DIRECT™** is for you. It will cost you nothing to get a confidential quote. Call today.

# Where We Are

Source Direct™

Rubber Factory

- **The factory. was founded in 1983 near Shanghai We manufacture various rubber and plastic products.**
- **The factory occupies area 215,000 square feet with multiple buildings on the site with a staff of 350, including 65 engineers and technicians, the company is very versatile.**
- **The company deals in China's 25 provinces and exports to the Netherlands, Germany, UK, USA, Japan and Korea.**
- **We have passed the ISO9001:2000 and ISO:TS16949 quality control system and the ISO14001:2004 environment protection system. We realize that they are integral to insuring a consistent product for export around the world.**

**When the raw material arrives, the quality department will monitor and insure the proper material. We buy from the US and other areas of the world and only secure rubber that meets our high quality standards.**

**Semi-auto Mixing System guarantees the correct material content. We have recently added a a\$1.5 million mixing machine to insure that we have the proper material configuration consistently for all of our products before the molding process begins.**

**The compounds are tested before the material is permitted to flow to the molding department. The tracking system is in place to confirm the mix compound from mixing to final molding for tracking of any issues. If the compounds do not qualify, they will be removed prior to production.**

**The presses are from 200T to 1600T. At present, we can produce a product 7ft x 6 ft**

**Each product is identified and labeled.**

## Saab rear view mirror parts

## Heavy presses

## Quality Control

## **INJECTION MOLDING FACILITY**

# Injection Molding

**Injection molded parts include automobile, industrial sewing machine, industrial door etc. At present, the largest part produced is 4.92ft.**

**Outgoing Inspection**

**Parts are packed as per the customer's requirements.**

# R & D

We adopt advanced CAD/CAM technology to design and manufacture molds enable us to design all kinds of molds according to customer's 2D, 3D Pro-E, Cdraw.etc drawings or hand sample. We have 10 professional experienced engineers in our R&D department. They are responsible for testing the usage character and assembling structure of the products offered by the customers.

By working with the clients, we will recommend with any unsuitable product design aspects and provide alternative. We also utilize mold flow analysis on every product. Any questioning critical component, we will make a handmade prototype for durable test accordingly.
